## WOOD STOVES NEO SERIES

CATALYTIC-FREE | EPA2020 CERTIFIED

# **NEO** SERIES

### FREESTANDING WOOD STOVES

The Neo LE wood stove makes a bold statement with its tall profile for easy loading, line-of-sight view of the flame, and modern design. Like its larger cousin the Neo 2.5 LE, the Neo 1.6 LE2 is a true heating machine with Pacific Energy's solid steel construction and floating firebox with stainless steel baffle. Choose the color that is right for your home with side panels available in a variety of porcelain enamel colors.

NEO 1.6 LE2 - IVORY

NEO 2.5 LE – STAINLESS STEEL

#### All Pacific Energy Wood Stoves come standard with these industry leading features:

- EPA 2020 Certified
- Reliable, durable, catalytic-free technology
- High capacity baffle system
- Multi-port combustion air injection system
- Air wash system for super clean ceramic glass
- Inside and outside combustion air capable
- Floating firebox for extended stove life
- Single-Lever Air Control
- Mobile Home Approved

75.4% 1.6 gm/hr. 16" 18″ 1.4 cu.ft. 152 sq.in.

### **NEO 1.6 LE2**

#### **STANDARD FEATURES**

ACMS (Advanced Combustion Management System) Easy to use ash disposal system Rich Metallic Black finish Heavy plate-steel top 304 Stainless Steel Baffle, Tubes, Rails and Flame Shield Boost air for easy lighting Mobile home approved Leveling Legs Integrated Heat Exchanger East-West fuel loading

#### **DESIGN OPTIONS**

Side panels in painted Metallic Black Steel, Stainless Steel, or a choice of three lustrous Porcelain Enamel colors

#### **PERFORMANCE OPTIONS**

Temperature-Actuated Variable-Speed Blower

**NEO 2.5 LE** For spaces up to 2000 sq. ft.

#### Heat Output Cord Wood 85,000 BTU

60,000 BTU EPA Test Fuel

Efficiency (HHV)	72%
Emissions	2.0 gm/hr.
Log Size (recommended)	17"
Log Size (max)	18"
Firebox Size	2.2 cu.ft.
Viewing Area	184 sq.in.

#### **NEO 2.5 LE**

#### **STANDARD FEATURES**

Extended Burn Technology (EBT) Easy to use ash disposal system Rich Metallic Black finish Heavy plate-steel top 304 Stainless Steel Baffle, Tubes, Rails and Flame Shield Boost air for easy lighting Mobile home approved Leveling Legs Integrated Heat Exchanger East-West fuel loading Removable cast iron trivet over cooking surface

#### **DESIGN OPTIONS**

Side panels in painted Metallic Black Steel, Stainless Steel, or a choice of three lustrous Porcelain Enamel colors

#### **PERFORMANCE OPTIONS**

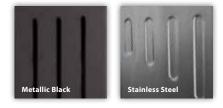

Temperature-Actuated Variable-Speed Blower

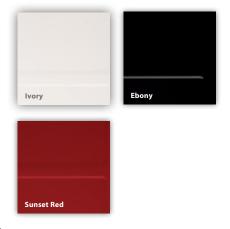

#### **STEEL OPTIONS**

The Neo 1.6 LE2 + 2.5 LE sidepanels are available in two steel finishes, painted metallic black or stainless steel.

#### **PORCELAIN ENAMEL OPTIONS**

The Neo 1.6 LE2 + 2.5 LE sidepanels are available in three porcelain enamel colors. Optional colors are available, please see Dealer.

PACIFICENERGY FIGEPLACE PRODUCTS HIGH R R ANTI

Pacific Energy leads the industry in premium catalytic-free clean burn technology. Our unique high capacity baffle system preheats secondary combustion air for an extremely effective reburn. By burning the combustible elements in the air, we improve our stove's environmental performance while significantly reducing the amount of wood consumed.

## EBT2 EXTENDED BURN

EBT2 (the second generation of Extended Burn Technology) is field proven to be highly effective at controlling the secondary burn system, extending burn times and reducing overall emissions.

## FLOATING FIREBOX

All fireboxes are subjected to wild extremes of temperatures. Solidly designed with steel brick support rails, our legendary floating system allows key parts to freely expand and contract to drastically reduce metal fatigue and add years of life to the entire appliance. The high capacity stainless steel baffle (part of the cleanburning secondary combustion system) and the flame shield (which protects the stove top from intense heat) are integral components of our legendary floating firebox system.

Our self-sealing ash dump system, with its spring -loaded trap door provides a time saving, hasslefree ash removal solution that, frankly, has yet to be equaled. Pacific Energy's machined steel, spring loaded ash removal sytem is opened from outside the stove and closes automatically for safety and convenience when you're done.

Pacific Energy developed the first effective air wash manifold systems, a design that flows preheated air to the glass surface to keep it clean. A refined design now creates a high-pressure zone in the center and forces air to flow from above and across the glass. Even at low air settings, we are confident that our air wash system is the most effective available. And that our glass doors are among the cleanest in the industry.
